

**Dulbecco's Modified Eagle's Medium
with L-Glutamine and Sodium Pyruvate
(DMEM)
Catalog # 09211**

Product Description

Many modifications of eagle's medium have been developed since the original formulation. The most widely used modification is Dulbecco's Modified Eagle's Medium, which was developed in 1969. Dulbecco's Modified Eagle's Medium with L-Glutamine and sodium pyruvate (DMEM) is a modification of Basal Medium Eagle (BME) that contains a higher concentration of vitamins and amino acids, as well as additional supplementary components. DMEM with L-glutamine and sodium pyruvate is well suited for supporting the growth of a broad range of mammalian cell lines.

Product Use

DMEM is for research use only. It is not approved for human or animal use, or for application in *in vitro* diagnostic procedures.

Storage

Store the medium at 4°C. Protect from light.

Shipping

Room temperature.

Caution: If handled improperly, some components of the medium may present a health hazard. Take appropriate precautions when handling it, including the wearing of protective clothing and eyewear. Dispose of properly.
