

McCoy's 5A (modified) Medium
(McCoy's 5A)
Catalog #09711

Product Description

Originally developed to support Walker Carcinosarcoma 256 cells and Novikoff hepatoma cells, McCoy's 5A Medium was first formulated using the vitamin and amino acid compositions from Eagle's and Medium 199 with modifications. Later, McCoy's 5A medium was further modified and supplemented to support the culture of a wide range of cell lines and mammalian cancer cells. McCoy's 5A modified medium contains 1.5 mM L-glutamine and 26.2 mM sodium bicarbonate and is designed for use in a 5% CO₂ incubator. McCoy's 5A (modified) medium requires supplementation with 10% Fetal Bovine Serum.

Product Use

McCoy's 5A is for research use only. It is not approved for human or animal use, or for application in *in vitro* diagnostic procedures.

Storage

Store the medium at 4°C. Protect from light.

Shipping

Room temperature.

Caution: If handled improperly, some components of the medium may present a health hazard. Take appropriate precautions when handling it, including the wearing of protective clothing and eyewear. Dispose of properly.
